Invitation

Exploring Diverse Applications of Medical Physics in Cancer Management

Dear Colleagues,

On behalf of the Organizing Committee, it is our pleasure to invite you to participate in the Annual Conference of AMPI-NC to be held in Varanasi on February 20-21, 2016

The conference aims to explore the diverse applications of Medical Physics in cancer management. It is open to all professionals involved in diagnosis and treatment of cancer using radiation. We believe that this conference will be an important and meaningful event in bringing together professionals and in contributing to a better understanding of changes and challenges faced in managing cancer patients.

The conference is aimed at medical physicists, clinicians, scientists, biomedical engineers and technologists, specializing in therapy, imaging, radiation safety, design and development of equipment.

Increased knowledge and technological advances in medical physics in earlier decades represent important steps in providing tools for effective imaging and precise radiation delivery to the area of interest. Technological innovations are sometime accepted without a thorough analysis of benefits versus pitfalls. The motivations for using newer technologies may be a combination of fancy advertisements, enthusiasm for newer things and competitive challenge. This competition is not allowing local industry to grow. Therefore, there is requirement to have need based less expensive and effective technology. There will be scope to discuss the "Make in India" program of Govt of India to make it more effective in technology used in cancer management. A major goal of the conference will be to educate Medical Physics students regarding the challenges of new technology.

The Conference will be academically rewarding and enjoyable. . The conference will give an excellent opportunity to discover the beauty and diversity of Kashi – The Oldest Living City in the World. We hope to make your stay comfortable and look forward seeing you in our midst and contribute towards the scientific deliberations. We look forward to welcoming you to Varanasi in February 2016.

With best wishes,

Dr. Satyajit Pradhan
Organizing Chairman

Dr A Mandal
Convener Scientific Committee

Dr Lalit M Aggarwal

The theme of the conference is “**Exploring Diverse Applications of Medical Physics in Cancer Management**” and deliberations would be on the following broad categories.

1. Treatment Planning
2. Patient Specific QA
3. Radiological Safety
4. Radiobiology
5. Instrumentation
6. Imaging
7. Radiation Dosimetry
8. Brachytherapy
9. Proton Therapy
10. Patient Immobilization and positioning
11. Radiosurgery
12. Advances in Radiation Oncology
13. Advances in Nuclear Medicine
14. Monte Carlo Applications

Oration
