**Dear Friends,
Greetings!**

Radiation has been used as a treatment modality in the management of cancer, since the discovery of X – rays. As on date high energy X-rays, electrons and gamma rays are employed in the form of 3DCRT, IMRT and IGRT techniques. Tomotherapy and Cyberknife equipments have emerged in addition to regular linear accelerators. The regular update of fast changing technology is necessary to confirm the precise delivery of radiation to the individual patient.

In this context, a four day workshop: “Updates on Clinical Radiotherapy” is being organized by the Dr Kamakshi Institute of Medical sciences and Research (a unit of Dr. Kamakshi Memorial Hospital) at Chennai in collaboration with the Anna University, during May 24–27,2016. The lectures will be delivered by senior international faculties having vast experience in this field. Along with the theory lectures, practical sessions will be conducted with participants in multiple groups.

This workshop will focus on the review and updates on advances on modern clinical radiotherapy in instrumentation, brachytherapy, external beam therapy, quality assurance and patient safety. Current advances will emphasis on the evolving issues on the philosophy of radiotherapy treatments in particular treatment planning, dose constraints, VMAT, SBRT, electronic medical records and patient safety. The mission of this International Workshop is to provide immediate transfer of International technique and clinical know-how on the practice of clinical radiotherapy to enhance safe treatment of cancer in and around India.

The participant's are radiation oncology and medical physics colleagues, residents, post graduate students and radiotherapy technologists. Only 150 participants will be included in the workshop, on first come first serve basis

Registration is compulsory for the participants. Those who are interested should fill up the registration form and return the same to the organizing secretary on or before April 30, 2016 along with prescribed fee. Post graduate students should send their application along with the authorization of head of the department. Workshop activity being accredited by CAMPEP and MDCB for 22 credit points each and 30 by the Tamil Nadu Dr M.G.R Medical University. This credit signifies the program is of the highest standard as recognized by scientific community.

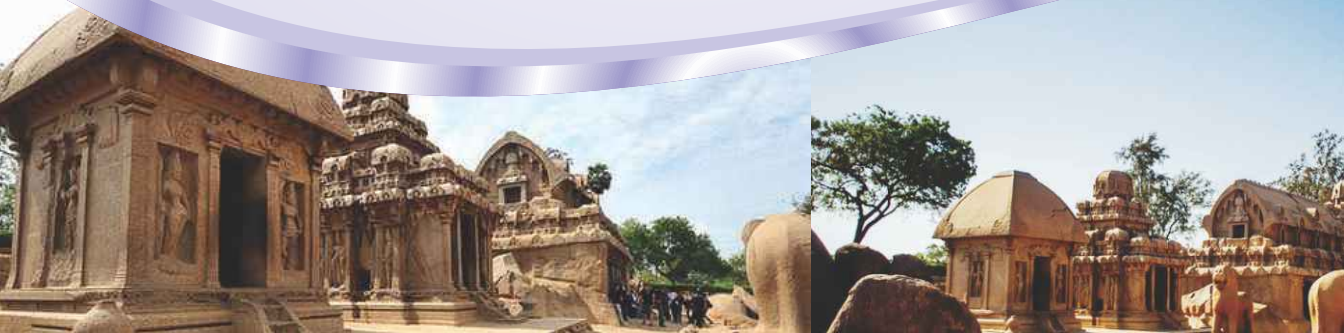

All the participants will be issued certificates, after the completion of the workshop. Participants should make their own arrangements for their stay at Chennai.
